Chat with any Documents

Kroolo AI is designed to swiftly find and summarize data in various document formats like pdf, ppt, xls, doc, txt and images. It enables users to ask document-related questions and get concise answers with the relevant excerpts and references.

Chat with PDF

Extract key insights and summarize complex concepts from pdf files. Quickly analyze reports and papers.

Chat with PPT

Extract insights from ppt and ppt presentations. Summarize slide decks and identify key visual points.

Chat with xls

Process and analyze csv, xls, and.xlsx spreadsheets. Extract insights and identify patterns from data.

Chat with TXT

Process and analyze txt files efficiently. Summarize content and extract main ideas from txt files.

Chat with DOC

Analyze doc and docx files efficiently. Extract key information and summarize content from documents.

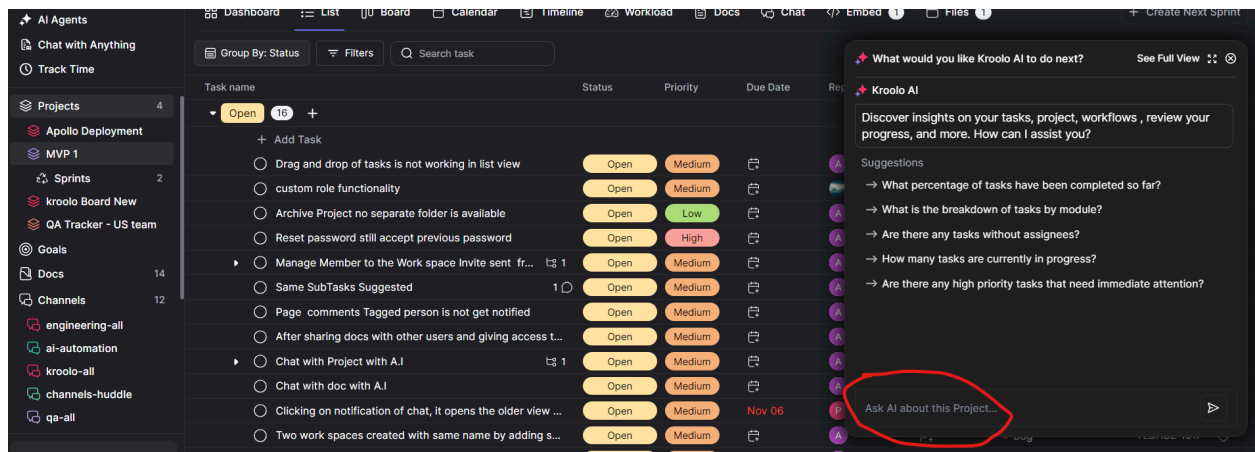

Chat with Image

Analyze and interpret jpeg, jpg and png images. Identify objects and extract insights from visual content.

How to chat with a document in 2 simple steps

Support for formats like epub , rtf , MD , Html , ods , odt , odp , mobi

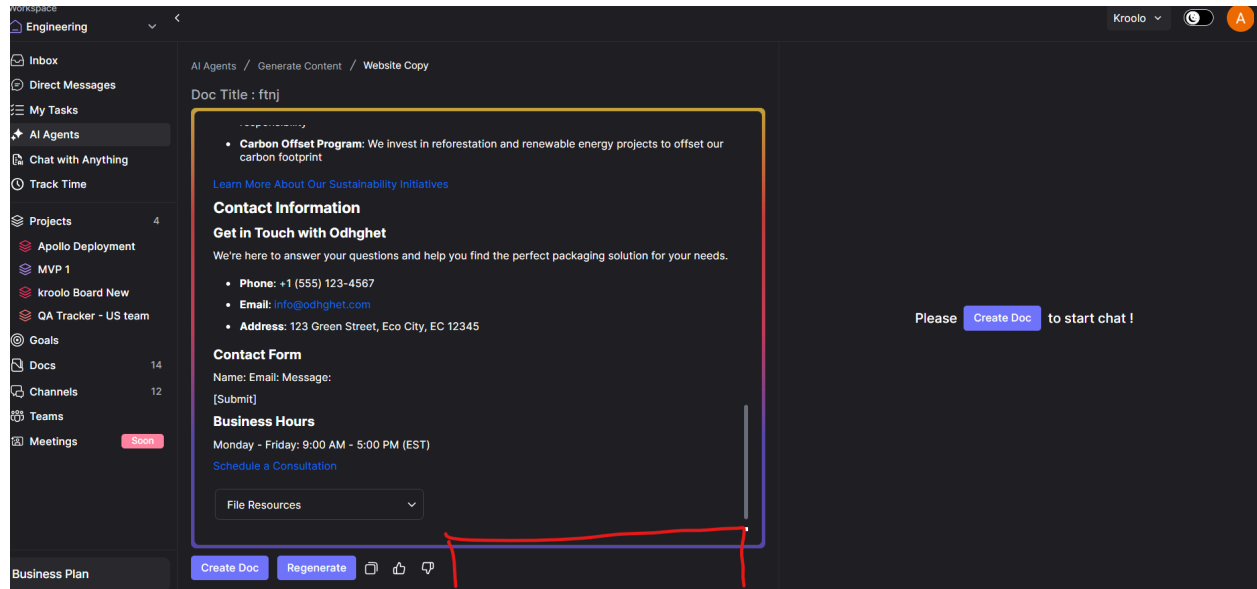

The screenshot displays the Kroolo AI interface. On the left, a sidebar shows navigation options: AI Agents, Chat with Anything, Track Time, Projects (4), Apollo Deployment, MVP 1, Sprints (2), kroolo Board New, QA Tracker - US team, Goals, Docs (14), Channels (12), engineering-all, ai-automation, kroolo-all, channels-huddle, and qa-all. The main area shows a task list with columns for Task name, Status, Priority, Due Date, and Reactions. A dropdown menu is open for the 'Open' status, showing a list of tasks. On the right, a chat window is open with the title 'What would you like Kroolo AI to do next?'. The chat content includes a greeting from Kroolo AI, a list of suggestions, and a text input field with the placeholder 'Ask AI about this Project...'. The input field is highlighted with a red circle.
